

The Zen of Coding

Web Development Boot Camp
Lesson 1.1

The Path of Learning

Your Goals

Basically, 100% of you said **new career**.

Your Goals

And why do you want a new career?

-  To pursue a **dream**
-  To escape a **dead-end job**
-  To be able to **create**
-  To follow a **fascination**
-  To attain **financial stability**
-  To obtain **financial freedom**
-  To **challenge yourself**
-  To be a **role model** to kids

Your Goal = Our Goal

As instructors, we take your goals
very, very seriously.

Support Team Promise

If you're willing to put in the time and take our advice, we're here to help you 100% of the way.

This goes for everyone working on this program:

- Instructors
- TAs
- Student Success Team
- Career coaches
- Everyone else!

But Remember:
Nothing good comes easily.

Our Keys to Success

Don't Be This Person:

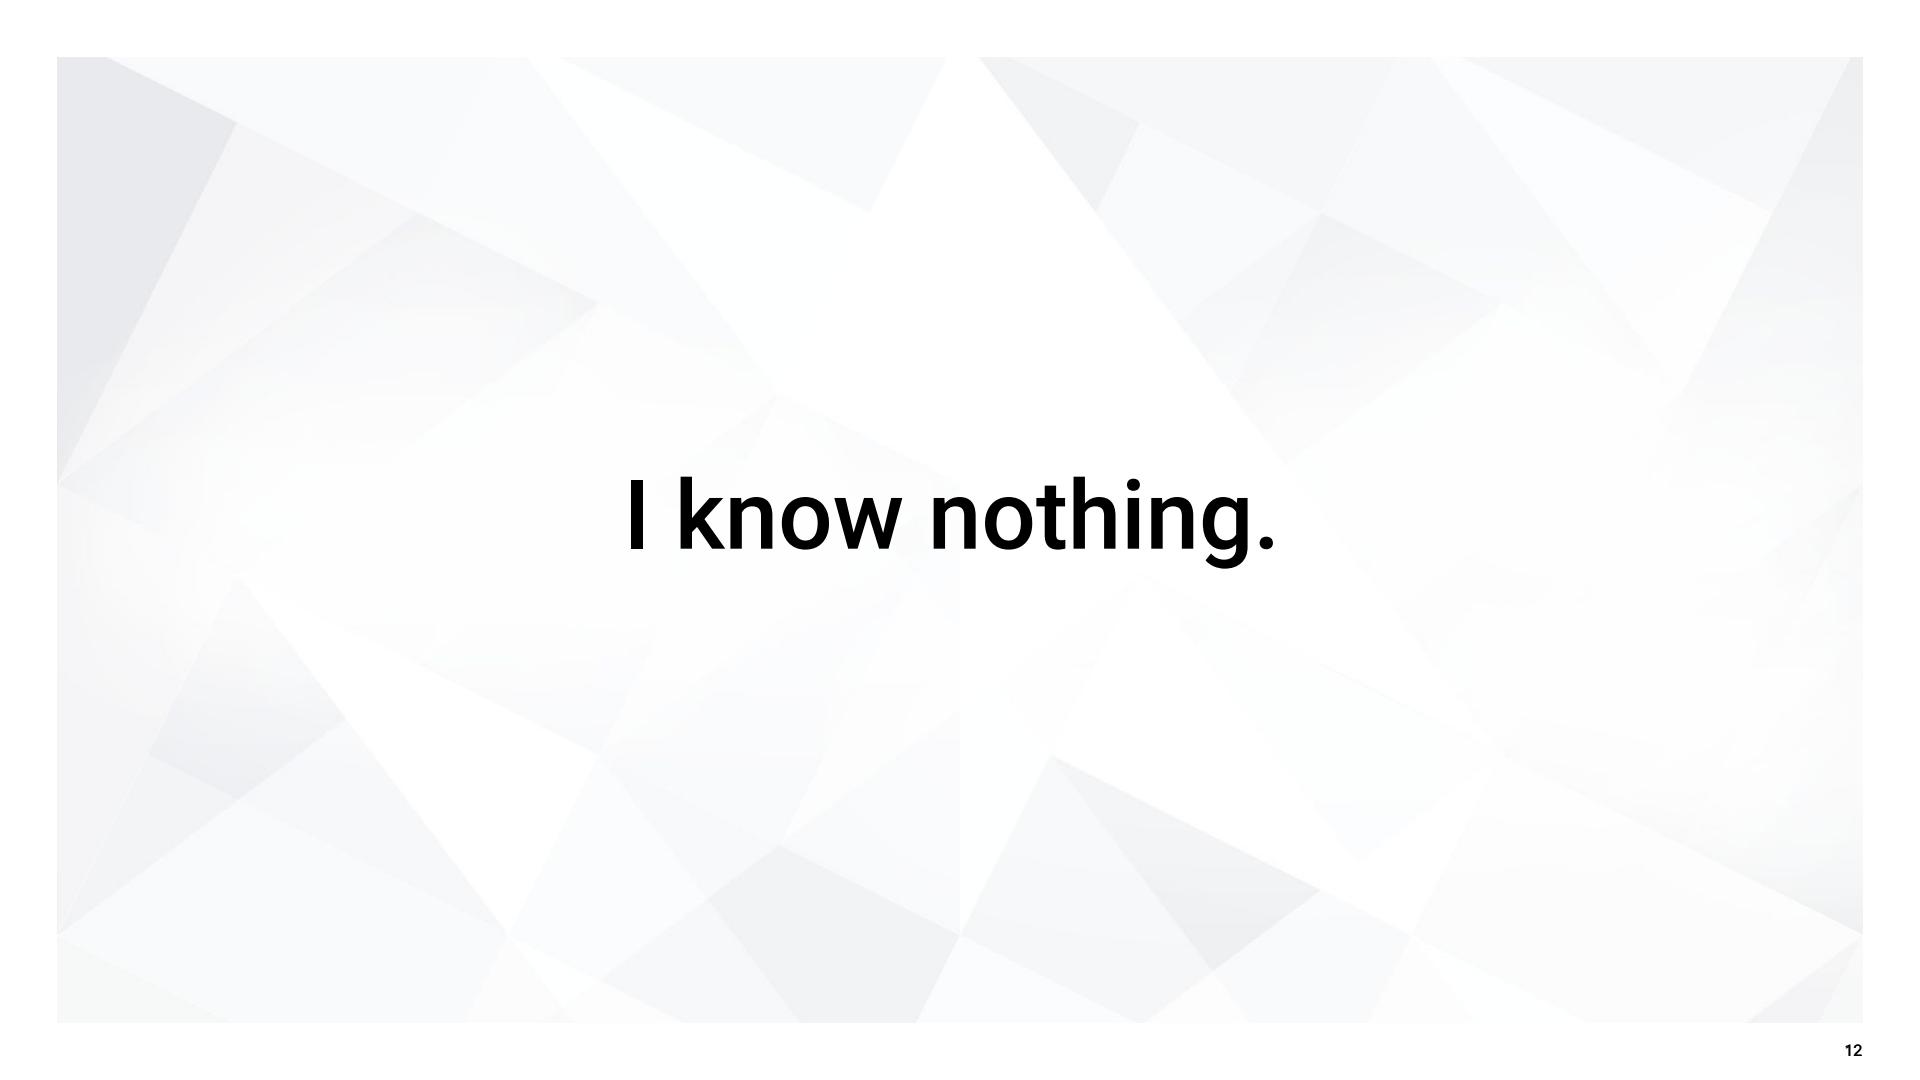

A close-up photograph of a baby with light blue eyes and a wide-open mouth, appearing surprised or excited. The baby is wearing a bright pink, zippered jacket. The background is a dark, textured surface covered in numerous small water droplets, suggesting rain or condensation. The overall mood is one of wonder and discovery.

This Should Be You

Our Mantra for Today and Beyond

When it comes to web development...

I know nothing.

You.

The Path of Learning

Nothing comes easy.
As students, you face three
HUGE obstacles.

Obstacle #1: The Great Confusion

My code doesn't work and I don't know why.

My code works and I don't know why.

Obstacle #2: The Great Doubt

“Maybe I’m just dumb.”

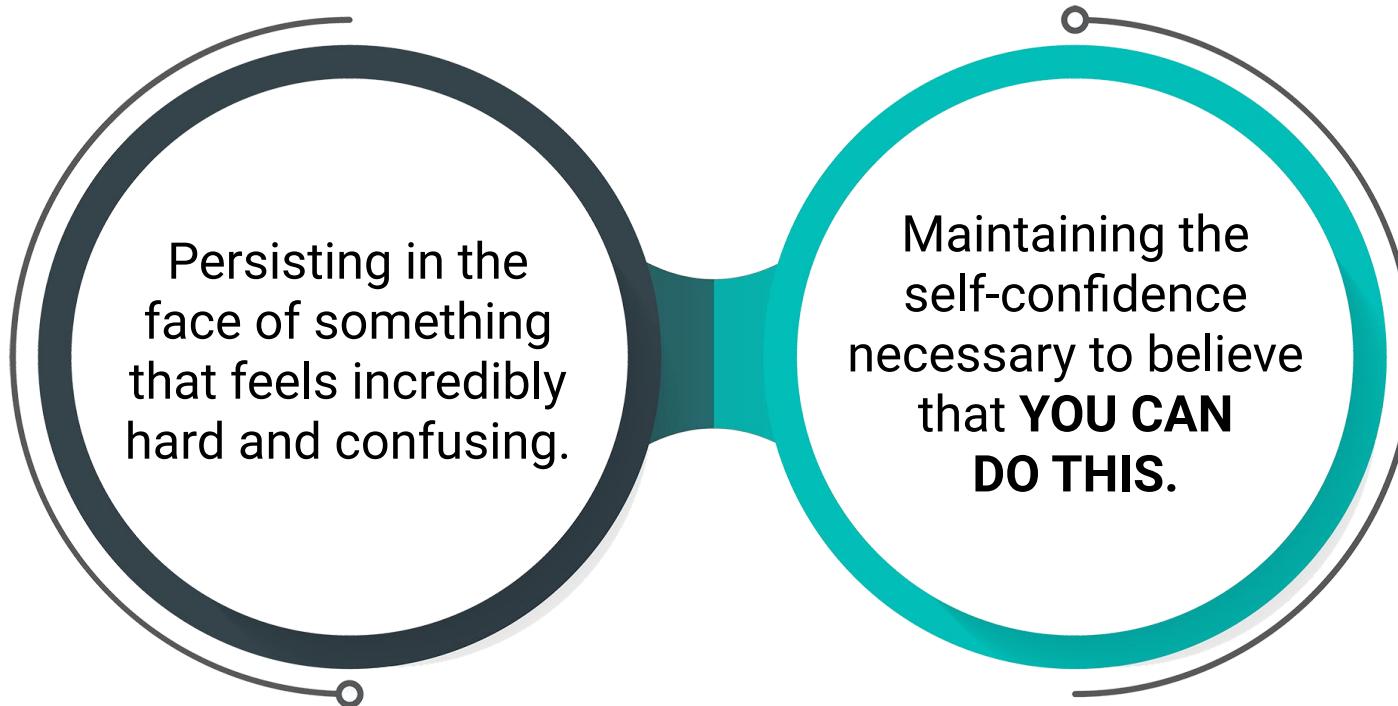

Obstacle #3: The Great Distance

Nothing Comes Easy

Learning to code requires two things:

Learning Can Be Frustrating

You can't tell whether you're learning something when you're learning it—in fact, *learning feels a lot more like frustration*.

What I've learned is that during this period of frustration is actually when people improve the most, and their improvements are usually obvious to an outsider. If you feel frustrated while trying to understand new concepts, try to remember that it might not feel like it, but you're probably rapidly expanding your knowledge.

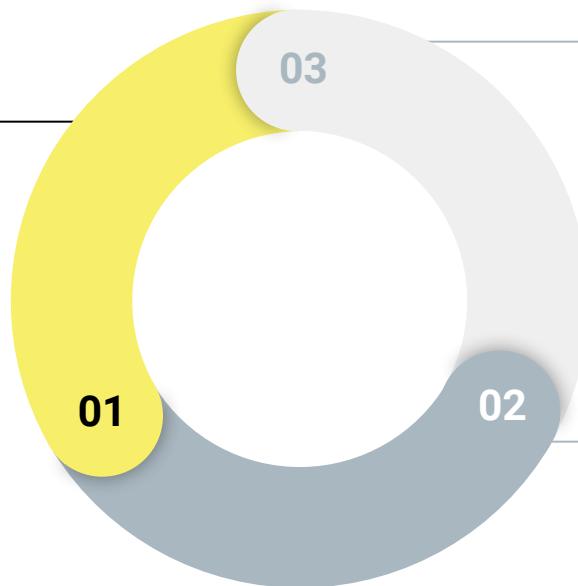

—Jeff Dickey, author of *Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js* (Peachpit Press, 2014)

Advice for the Journey

Throughout this course, always remember to:

Work hard!

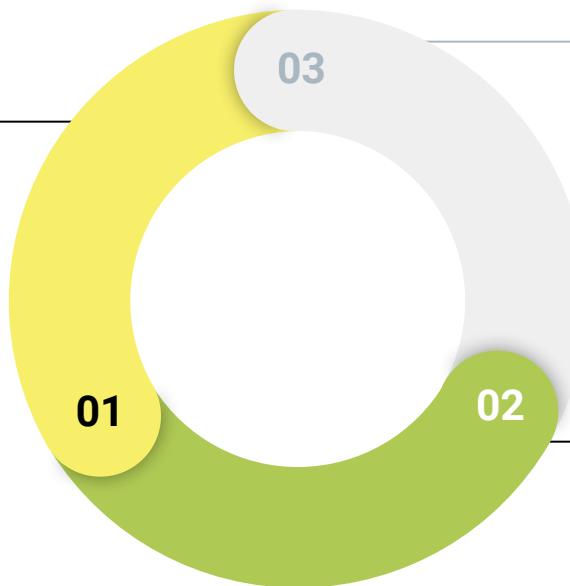

Trust yourself

Appreciate your successes

Advice for the Journey

Throughout this course, always remember to:

Work hard!

Trust yourself

Celebrate your
successes

Advice for the Journey

Throughout this course, always remember to:

Work hard!

Trust yourself

Celebrate your
successes

And Remember...

If you want to go fast, go alone. If you want to go far, go with a team.

Google Fu: The Most Important Skill of All

| What Is Google Fu?

Course Structure

Daily Schedule

In each class, we'll cover the following:

- 01 Set objectives
- 02 Brief background lecture
- 03 Watch me/coding demos
- 04 Code discussions
- 05 In-class exercises
- 06 Project work

Daily Schedule

In each class, we'll cover the following:

01

Set objectives

02

Brief background lecture

03

Watch me/coding demos

04

Code discussions

05

In-class exercises

06

Project work

This is the super important
stuff—ALWAYS BE CODING!

Prework

Software Checklist

At this point, you should have all of these installed:

- Slack
- Visual Studio Code
- Git
- Git Bash (Windows) or Terminal (Mac)
- Node.js
- Heroku-CLI
- Google Chrome

Accounts Checklist

You should also have accounts for:

- GitHub (with SSH Integration)
- Heroku
- LinkedIn
- Stack Overflow

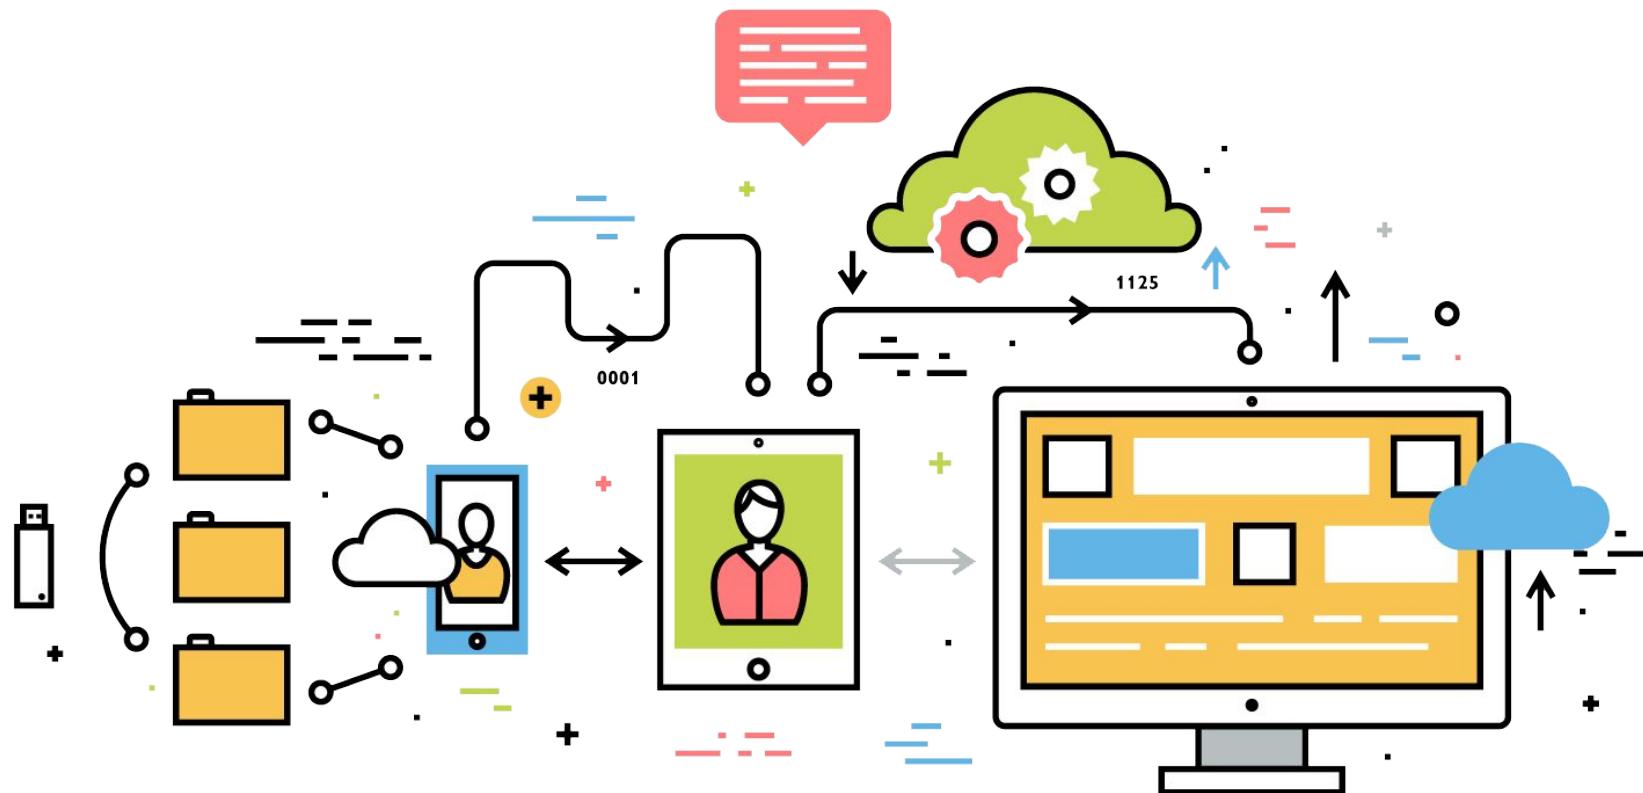

Self-Check

Let's do some quick checks of the following:

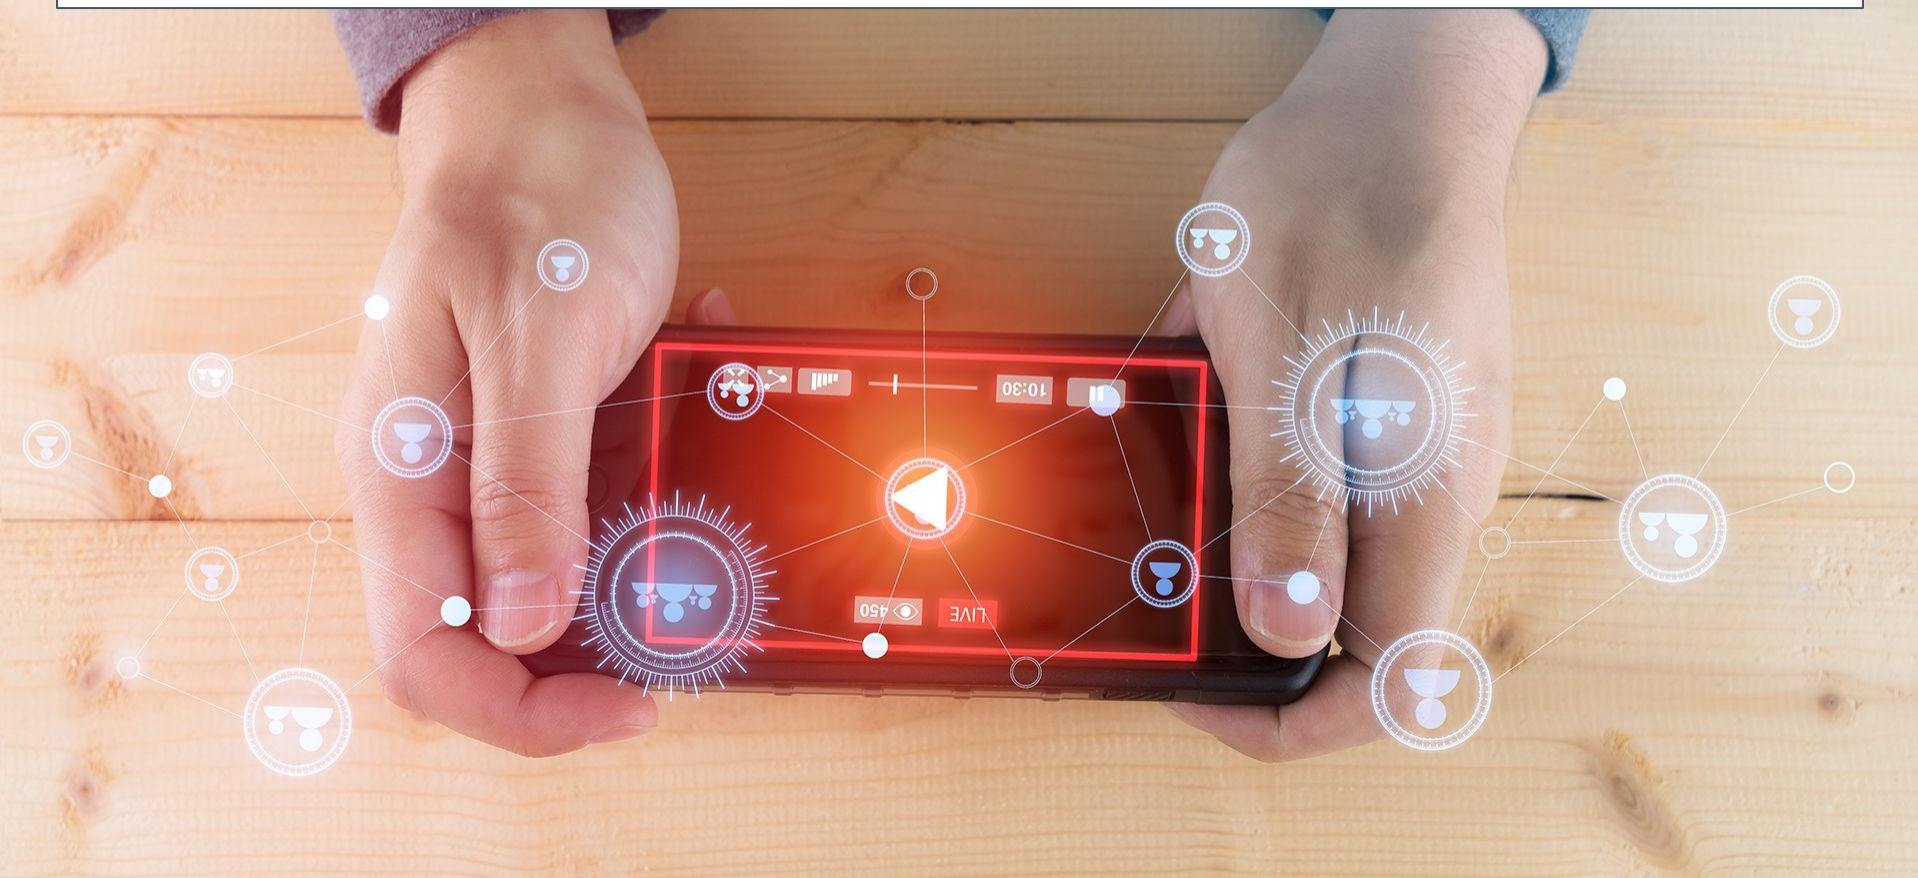

- Visual Studio Code Check
- Git Bash/Terminal Check
- Node Check
- Git Check
- Heroku Check

The Modern Web

What Exactly Is Full-Stack Development?

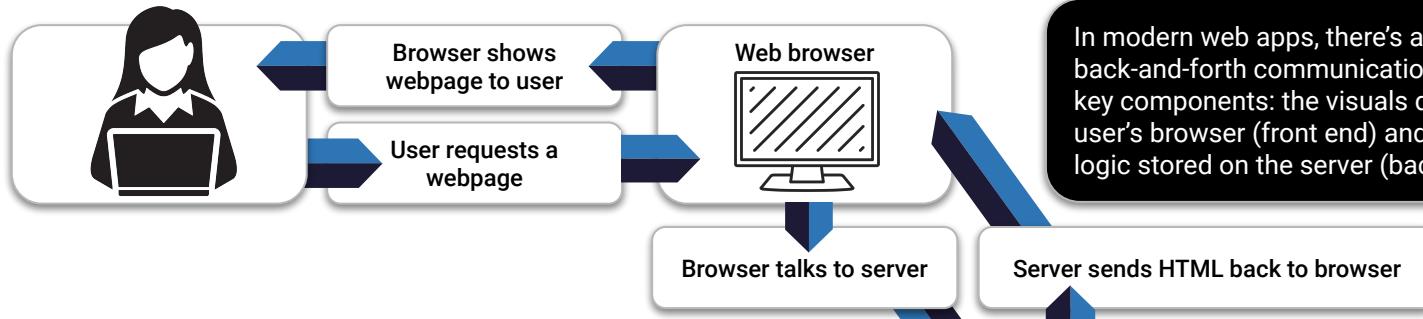

The “Magic” of YouTube

Let's Get Crackin'!

Intro to Console/Terminal

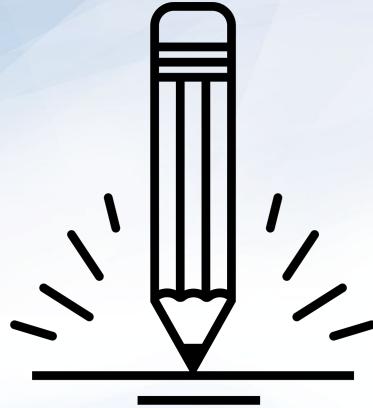

A screenshot of a Mac OS X Terminal window titled "Macintosh HD — bash — 80x26". The window shows the output of the command "ls -l". The output lists numerous files and directories in the root directory, including "Applications/", "Developer/", "Incompatible Software/", "Library/", "Network/", "System/", "User Guides And Information@ > /Library/Documentation/User Guides and Information.localized", "Users/", "Volumes/", "bin/", "cores/", "dev/", "etc@ > private/etc", "home/", "mach_kernel", "net/", "opt/", "private/", "sbin/", "tmp@ > private/tmp", "usr/", and "var@ > private/var". The "Volumes/" directory is highlighted with a green rectangle. The terminal prompt at the bottom is "OSXDaily@hyrule:/\$".

```
OSXDaily@hyrule:/$ ls -l
total 16053

Instructor Demonstration

Let's Get Crackin'—Intro to Console

Activity:

Console Commands

Suggested Time:
12 minutes

Activity: Console Commands

Create a folder on your desktop named code. You'll put all the code you write today inside that folder.

Best Practices:

Always use lowercase for folder and file names.

Never put spaces in folder and file names.

Use dashes to separate words in folder and file names.

Suggested Time: 1 min

Activity: Console Commands

From the Terminal/console and using only the command line:

Create a new folder with the name `first_day_stuff`.

Create a new HTML file with the name `first_day.html`.

Open the current folder containing the new HTML file.

BONUS!

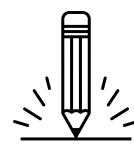

Create multiple directories/folders with the names `one_folder` and `second_folder` with one command.

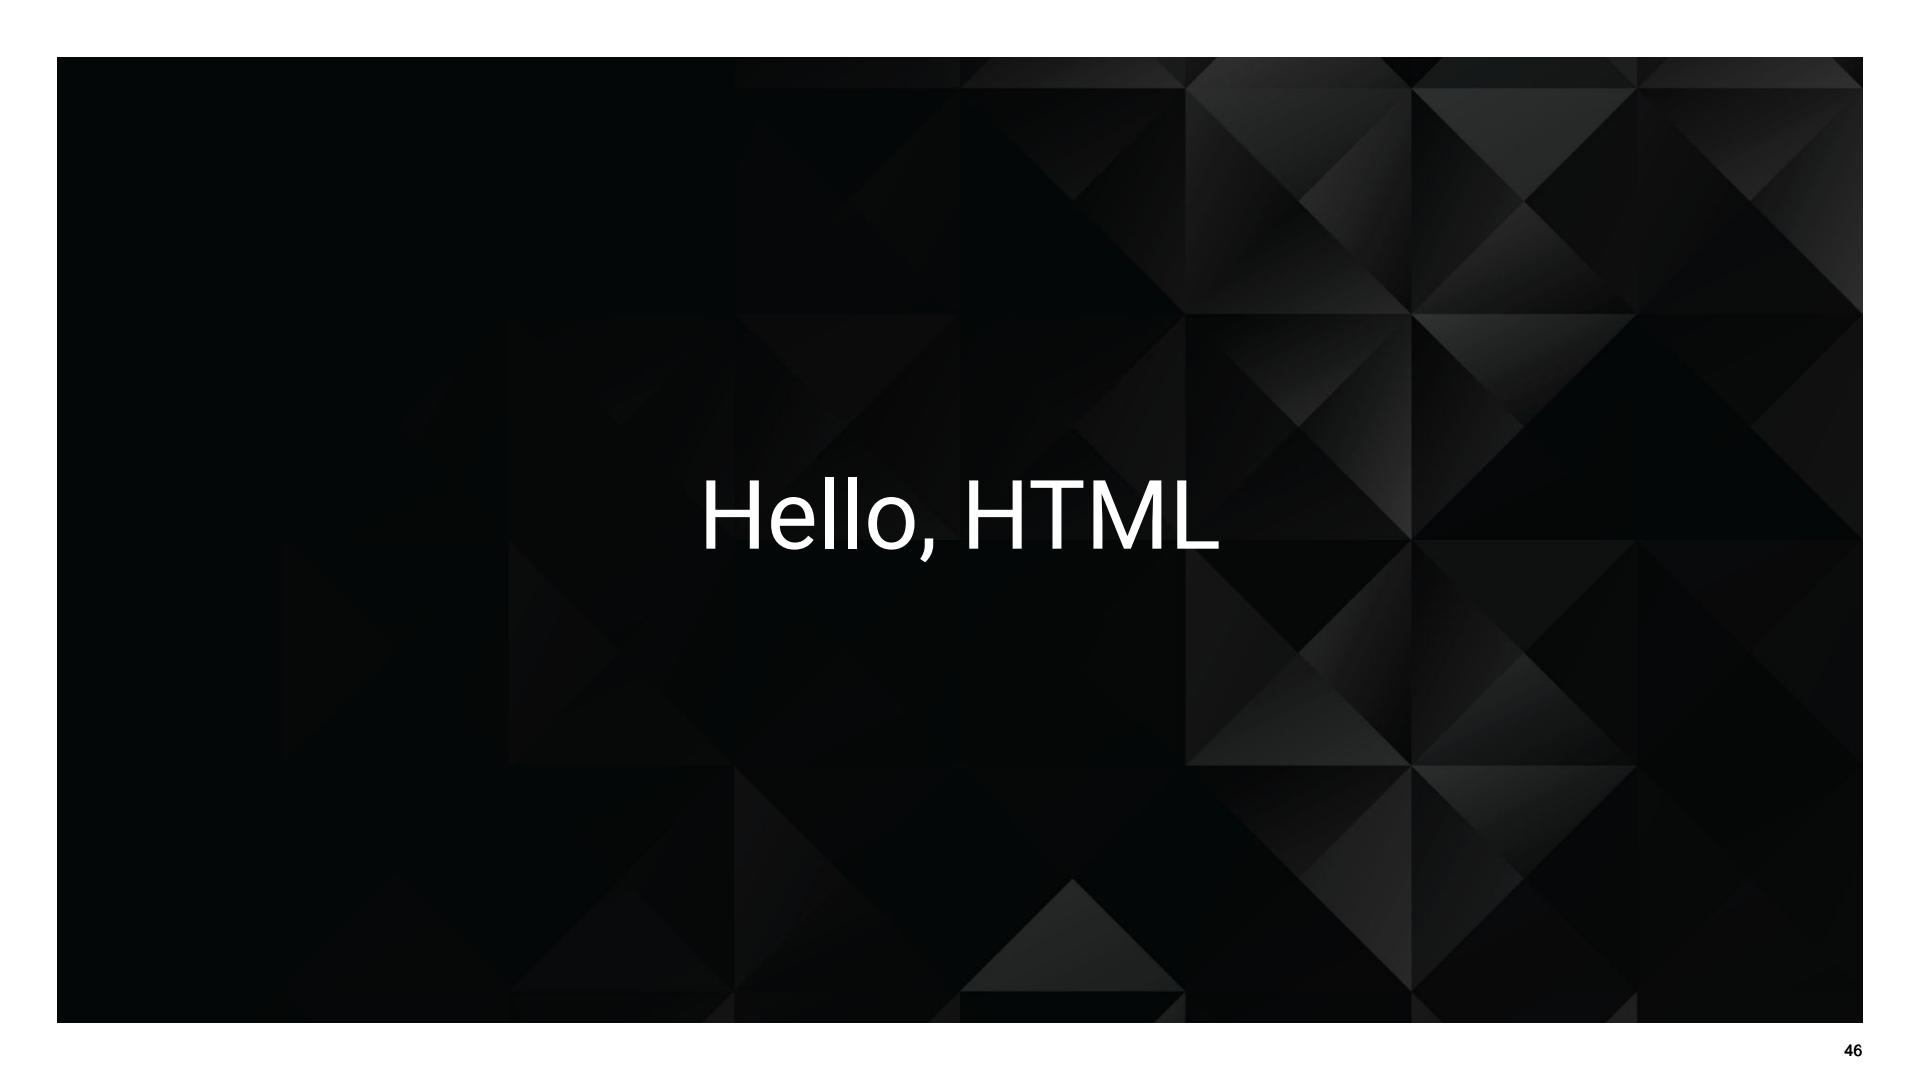

Create multiple files with the names `one.html` and `two.html` with one command in the `first_day_stuff` directory.

Suggested Time: 12 minutes

Intro to Console: Discuss with Neighbors

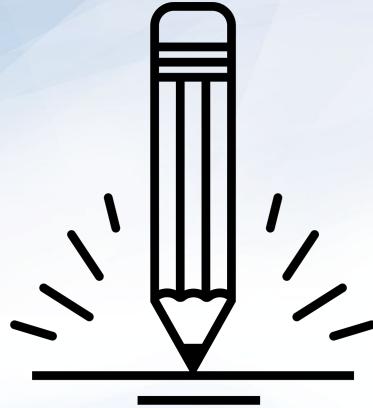

Hello, HTML

<title>Intro to HTML</title>

HTML5

- HTML is one of the three base languages behind every website.
- It defines all the basic content and a bit of formatting.

Activity:

Intro to HTML

Suggested Time:
5 minutes

Activity: Intro to HTML

In a new HTML file, create the basic structure of an HTML document and include the following in it:

- DOCTYPE declaration
- Head tag with a title tag
- H1 tag with a title of your choice
- An embedded image

Now add the following three links to your page:

- One link that has target="_blank" so that it opens a new tab when clicked
- One link that is bold
- One link that is only a placeholder (it goes nowhere)

BONUS!

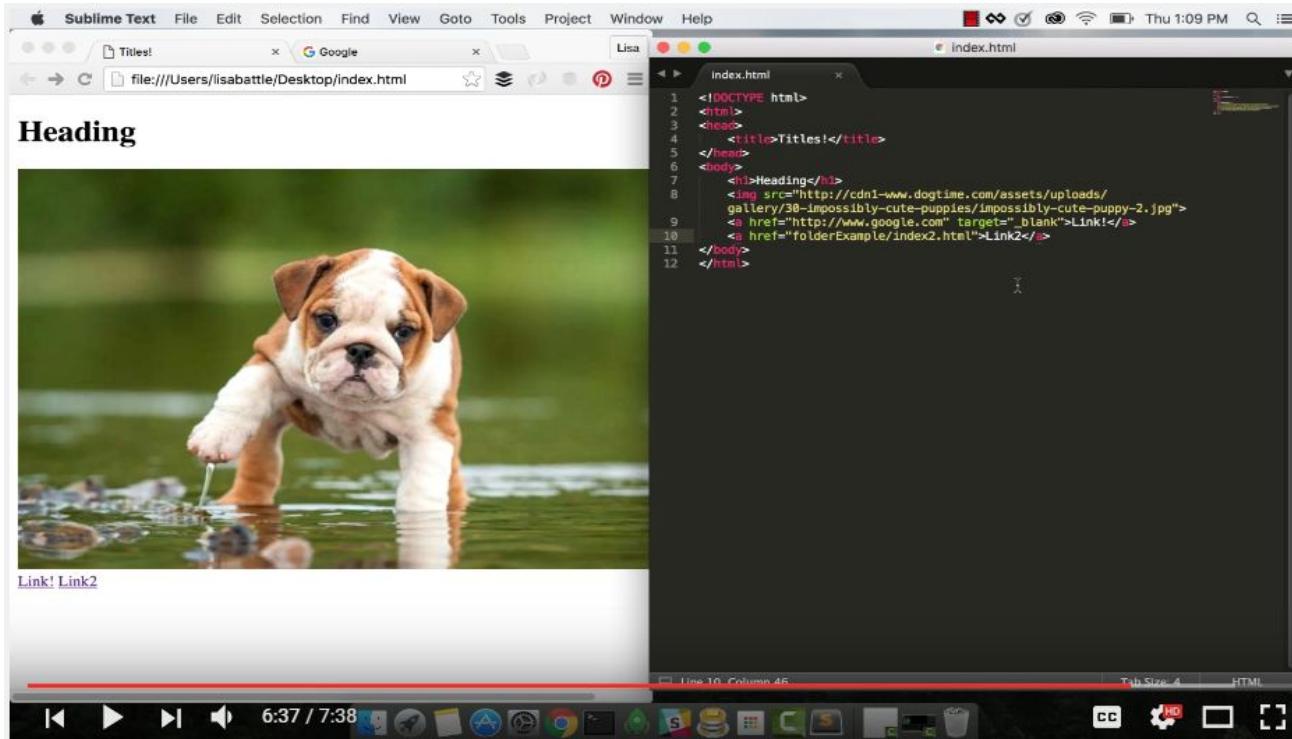

- Create an ordered list of steps to make a sandwich
- Create an unordered list of five bands/musicians you like
- Create a table with two columns (animal class and animal name) and four rows of animals
- Use an alternate way of separating links without line breaks
- Embed a YouTube video of your favorite band/musician

Suggested Time: 5 minutes

YouTube Video Walkthrough
